

Spangler Knot

Step 1: Make a double loop through hook ring.

Step 2: Place tag end behind main line and through double loops.

Step 3: Bring tag end behind and around again.

Step 4: Put tag end through all loops.

Spangler Knot

Step 5: Moisten lines and slowly tighten small loops against larger loops.

Note: Use less tension pulling on tag end when cinching knot.

Step 6: Place hook under tension and pull main and tag lines slowly together; trim end. Make sure loops do not cross.

Note: For larger diameter lines, pull on tag line to cinch against loops.

Alternative method: tie under pressure; wrap around finger from the beginning and finish knot in the same manner.

Alternative method: make triple loop instead of double loop and finish knot in the same manner. This knot is about 5 percent stronger than double loop version.
